Friends are nice things to have but one penny can give you more free advertising than a 100 free friends.

A man who doesn't own an automobile wonders what becomes of all the mails and trucks that are manufactured.

The "mischief" girl is now the term applied to young women who leave the paternal home and strikes out herself.

It's not that a man now stands that really counts; it's how far he has come, and the obstacles he has passed on the way.

Will there ever come a time when a nation that goes to war will be arrested for disorderly conduct by the international police?

A man finds his wife looks like a blouse feel who hoists her skirts to cross muddy streets. But it is different when some other man's wife hoists hers.

An exchange says there are other forms of foot and mouth disease besides those treated by veterinarians. For instance, the statesman who overworks his mouth and gets his foot in it.

"Anyway, sociologists generally are long haired women and short haired women who refuse to admit gathering useless statistics about other people's business," says the Montreal Mail. That should make them be good.

The man who knocks the town in which he makes his living, is merely a poor begotten way now traveller on the Sahara of life who wouldn't

know an oasis from a tar-pot. Say a good word for your home town; my boy, some fellows are very apt to repeat what you say.

A good deal of hard times are brought about by falling them hard. The times are something as easy and scuffle as a woman. Tell her she is ugly and she will put on red, let and be ugly. Tell her she is pretty and her face will assume a prettier expression. Give the times a little flattery now and then and you will hear much easier they will appear.

In glancing over our exchanges last week, we notice where an Alberta editor took the trouble to tell us that the editor who has ever walked to such a place to take a glimpse at those who are enjoying the long rest—most of us can see through "dead ones" when looking through our front windows to satisfy our curiosity until such time as we will meet them face to face "over the border."

On Wednesday, July 29, there will be an excursion train run to Banff under the auspices of the Methodist Sunday Schools of High River. The train will pass through Claresholm at 5:52 in the morning and returning will leave Banff at 10:00 in the evening. Fare for round trip, adults \$10.00, children \$1.25. Tickets may be purchased at the local depot any time and parties intending on taking this trip will do well to purchase tickets early and not leave them till train time.

JUNIORS WIN AGAIN

The junior baseball team accompanied by Rev. H. M. Henderson made a visit to Staveland last Tuesday to play the junior team there. The home team were the victors by a score of 16 to 11. The visitors were then invited to the home of Mrs. Rae, where a very tasty supper was served on the lawn. After a very enjoyable day's outing they returned home in the train. A return match will be played at Claresholm next Wednesday. As the Staveland boys are improving a fast game is anticipated.

CLARESHOLM VS. CLEAR LAKE

The half holiday yesterday was entirely a failure as far as sports were concerned owing to the fact that voting was the only thing in everyone's mind. Nevertheless Clear Lake's baseball team showed up in the evening and put up a hard seven inning game against the town's team which resulted in favor of the town by one. The score being 8 to 7. Claresholm lost their lead in the fourth inning but did not get discouraged which was clearly shown in the seventh when the game was won.

After the game the boys and girls met at the I. O. O. F. hall and enjoyed themselves until the wee hours of morning dancing. The dances were given by a few of the bachelor boys of town and although the dances were not a big success as their first one owing to the extremely hot weather. The boys broke even and everyone seemed to have had a good time. The music was furnished by the McCormick Orchestra. A light supper consisting of sandwiches, cake and coffee which was served by the boys. As the supper hour was twelve o'clock dancing commenced for three more hours.

A Study in Soil Cultivation

An exceptionally valuable Bulletin to those interested in soil culture is No. 38, "Field Husbandry: Summary of Results," issued by the Division of Field Husbandry of the Experimental Farms, and that can be had by application to the Publication Branch, Department of Agriculture, Ottawa. Reports on six years of work carried on at the central and branch farms and the results with advice founded thereon are set forth in the Bulletin according to years. Following are a few of the benefits given as derived from adopting a judicious system of rotation.

1. The appearance of the farm is improved.
2. Every field receiving at regular intervals its fair share of manure and cultural treatment, the entire farm is in a condition to ensure a maximum yield.
3. Cost is lowered by the saving of time due to all the work of a kind being confined to one field.
4. Fewer weevils are required.
5. Machinery can be more economically utilized.
6. More live stock can be kept, thus increasing the quantity of available manure.
7. Profits and yields are increased.
8. The farmer is not dependent upon a single crop.
9. Permits a more even distribution of the season's labour.

Following details of the rotations that are outlined is a summary of the characteristics common to all:

1. Grain fields are always seeded down with clover, even though it be used only as a fertilizer.
2. Grass and clover seedings are very heavy. Increased crops of hay and natural pastures of a catch have justified them.
3. Root crops from a large proportion of every rotation. An attempt to farm a small area without a root crop was not successful. Weeds could not readily keep in check.
4. No field is left in hay for more than two successive years. The records show that the second crop almost always costs more per ton than the first, and that succeeding crops are liable to be grown at a loss.
5. Barnyard manure is preferably applied frequently in comparatively small quantities; rather than at long intervals in large quantities.

Expenditure required and derivable profits are fully explained, and the values of commercial fertilizers and the relative virtues of deep and shallow ploughing. Due regard to weather conditions and to the different varieties of soil make the Bulletin of national importance and worthy of close study and wide inquiry.

A Ten Dollar Bill and a Woman

Gives a woman a ten-dollar bill and what is the first thing she will do with it.

Will it be a "bee-line" for the store? No much!

Will it go down into the feminine "bank"?

Possibly—tor temporary security. But that ten-spot will afford her more ecstatic pleasure than a man could draw out of a hundred, or a clay pipe.

First she will hunt up the last issue of the ten-spot paper and see what it has to offer in the way of bargains—anything just so it is a bargain. These will be carefully and painstakingly checked off with a two-cent stub of a pencil and then it will be a hunt for a pair of shoes, or a summer hat, or any one of a thousand other things.

The number of articles she will see out of that ten-spot is amazing.

Where a man would spend it all in one hour, a woman will have a list a foot long.

But vice into the merchant whose advertisement is not in the paper

when she goes out to the part with that too. He is a luck number.

For she will have every article catalogued before she ever extracts the last green from her "bank". She will know right where to go with each purchase, just how much she wants, and what she is willing to pay. She has probably consumed six hours in compiling the list, has killed another half dozen in the stores, and will go home with six months of pleasure tucked away under her arm or responding to the look-out of the buggy.

But then there is her way because she is a woman. And women are women. Because they are women they are entitled to the best of all things in life. Give your wife a ten-spot.

THE NATION'S BUSINESS

The Toronto Star says:

"Over one hundred requests for farm laborers have been received by Inspector Brundage, of the Dominion Immigration office at the Union Station. The orders are from various districts throughout the province. A lack of funds has caused stagnation in the department, and the orders have not been filled. The orders have been accumulating since the end of May, when the transportation privilege was cut off."

The Dominion is maintaining at great expense Department of Agriculture and Labor for the purpose of promoting farm production and adding workers to secure employment. At no time in the history of Canada and the Empire has it been necessary to increase production and provide work, yet our Cabinet Ministers, whose duty it is to attend to this, are not doing so. It is not a pleasant taste to find fault with these Ministers. Messrs. Burrell and Crothers are men of charming personality, high character and no doubt a conscientious desire to do their duty. They do honor to the constituencies they represent in Parliament. But many months' experience shows that these men are lacking in the great essentials to properly perform the duties the country expects from them. They have neither the energy nor the executive capacity.

It is not their fault they were selected to fill these Cabinet positions. It is the fault of our system, which does not give the Prime Minister the right to select for great executive positions the best men available. He is practically compelled to draw his lists of candidates from the House of Commons. In selecting Burrell for Agriculture and Crothers for Labor, he probably got the very best men available in the House for these positions. But times are serious and these gentlemen, knowing they are incapable of filling their offices, should, without delay, ask the Premier to take men of proved capacity in their places.

If these men are to be sympathized with for being compelled to accept positions for which they are unfitted, the country is to be congratulated on having in the leader of the Senate, Hon. Mr. Loughheed, a man who is showing energy and capacity in dealing with this emergency. Mr. Loughheed is Acting Minister of Militia. He has quickly grappled with the situation, and has given orders that the troops now training in Canada for the front are to hold themselves in readiness to aid the farmers in harvesting the crops.

It may be remembered that some months ago The Financial Post, in referring to the danger of Sir Robert Borden breaking down under the tremendous load he was carrying, suggested that Mr. Loughheed be made Deputy Premier to relieve him of some of his most arduous duties.

THINGS THAT DON'T HAPPEN

The Old Subscriber:—Good morning, Mr. Editor, just dropped in to leave you a news of my new potatoes and tell you that your paper gets better every week. Your account of my daughter's wedding was written in good style. I'll take about \$2 worth of extra papers. Say you did the other editor up in great shape, in regard to licensing saloons. By the way, here's a dollar and a half, send your paper to that squaw-like of mine in Oshkosh. Guess I'll better give you another dollar and a half and let her send it to my wife's sister back in Kokomo. My crops are looking fine. Well I guess I'll be going to run for sheriff and want you to say a good word for me. Of course you can't work for nothing, so here's ten dollars—But just then the editor woke.

VULCAN STAMPEDE

Vulcan is to have a stampede on Wednesday, August 11th, for which a splendid programme has been arranged, including bucking contests, steer roping, relay race, polo, riding, Indian races, Ford race, cowgirl race, relay race, relay race and horse contests.

That this is to be the best one-day stampede in the south of the province is testified by the fact that the management are making efforts to secure such riders as Mr. E. L. Lefebvre, who won the championship at Glendon this year.

The new grounds and race tracks will afford splendid accommodations and sight-seeing for the crowd that is expected to be in Vulcan that day. Arrangements are underway with the Railway company to have special

train service and no effort is being spared to make the Stampede in every way comparable with the best. \$25.00 is the amount of the prizes. For tickets including entries, etc., may be had from the Secretary, Stampede, Vulcan, Alberta.

THE HOME MARKET FOR DAIRY PRODUCTS

What One Creamery Company Pays Out in Central Saskatchewan— Superior Development

The theme of the article is that "Made-in-Canada" involvement is not not always apparent. The farmers' home market is often spoken of in discussions of the fiscal question, but the article points out that the "Made-in-Canada" is sometimes difficult to trace. However, the enormous expansion in the dairy industry in the last four years has resulted in great gains from the building up of towns and cities, whose citizens demand an ever increasing supply of products such as ice cream, etc. The residents of any town or city who derive their living from its commercial and industrial activities are thus dependent on the increasing trade; so, employees in factories in Western towns; the railway employees and the business and professional classes in the cities. The employer to the wants of this population constitute the farmers' most valuable market for the products of mixed farming. Canada's dairy industry is thus supplied. It is obvious, therefore, that the greater the amount of goods made in Canada; farmers and bought by Canadians, the greater the demand will be the demand for the products of the farm from those communities in which these manufactured products are

Industry

The following extract from the advertisement of the Saskatchewan Creamery Company in the "Saskatchewan Farmer" for February, affords an excellent idea of the growth of the dairy industry:
